## WORK EXPERIENCE

### **SOFTWARE ENGINEER** Nov 2017 – Present

Treez.io | Oakland, CA

- Full Stack web-development using React/Redux, Spring, MySQL, Laravel, etc.
- Built both internal/external tools increasing supportability of the application.
- Wrote MySQL scripts for tasks such as data manipulation, mass data imports, and report generation.
- Developed a generic CRUD API using Java's Reflection API to centralize Entity management.
- Worked in a team to completely redesign the application's inventory system as a micro service.
- Acted as main developer support to debug any production issues for over 100 clients.

---

### **SOFTWARE ENGINEERING INTERN** Jun 2017 – Nov 2017

TourMega | Mountain View, CA

- Full Stack web-development using Ruby on Rails.
- Redesigned checkout process leading to an increase in tour bookings.
- Setup Minitest framework to enable test driven development.
- Wrote importer to map partner's tours into our application.

---

### **LEAD MATH INSTRUCTOR** May 2015 – Nov 2017

Kumon Math & Reading | Milpitas, CA

- Delegated and assigned responsibilities to other instructors in teaching up to 30 students at any given time.
- Managed the performance and progression of all my student.
- Responsible for teaching college level Calculus, which is the highest level of math offered at Kumon.

---
